CAPSTONE PROJECT DELIVERABLE • WEEK 4 CERTIFICATION

End-to-End Retail Sales Analysis & Dashboard

Comprehensive analytical report synthesizing Python cleaning, SQLite schema querying, and Power BI visualization.

AUTHOR	DATASET	TOOLS	DELIVERABLES
Rohit (Data Analyst)	Global Superstore & Orders	Python, SQL, Excel, Power BI	Code ZIP & PDF Explanation

1. Executive Overview & Global Performance

This study delivers an end-to-end audit of sales performance, profitability margins, and geographical order velocity. Data was cleaned and profiled via Python (Pandas/Seaborn), aggregated using SQL relational logic, and finalized as an interactive Power BI dashboard.

TOTAL GLOBAL SALES
$4.91M
Verified $49,14,147.15 across orders

MEAN LINE VALUE
$413.94
Median: $217.02 | Mode: $256.74

CENTRAL US SALES
$501.24K
Net Profit: $39.71K (7.92% margin)

PRODUCT CATEGORIES
3 Groups
Tech, Furniture, Office Supplies

2. Python Data Cleaning Pipeline & Validation (pythonass.ipynb)

Raw inputs were parsed to eliminate anomalies, impute missing values with median values to avoid skewness, and remove redundant entries.

```
import pandas as pd import seaborn as sns df = pd.read_csv('data.csv') # Impute numerical features using median values num_cols = df.select_dtypes(include=['number']).columns for col in num_cols: df[col] = df[col].fillna(df[col].median()) # Handle categorical null values & drop redundant records df.drop_duplicates(inplace=True) df.to_csv('cleaned_data.csv', index=False)
```

Execution Log: Initial missing: Date=1, Calories=2 >> Post-cleaning null count: 0 across all dimensions.
Validation: Redundant duplicate records dropped. Cleaned file exported as 'cleaned_data.csv'.

3. Relational Database Modeling (SQLite.sql)

```
-- Step 1: Create normalized schema & Step 2: Insert verified records CREATE TABLE customers (customer_id INT PRIMARY KEY, first_name VARCHAR(50), last_name VARCHAR(50)); CREATE TABLE orders (order_id INT PRIMARY KEY, customer_id INT, total_amount DECIMAL(10,2), order_status VARCHAR(20)); -- Step 3: Run Top Customers Query (Completed transactions only) SELECT c.customer_id, c.first_name, c.last_name, SUM(o.total_amount) AS total_spent FROM customers c JOIN orders o ON c.customer_id = o.customer_id WHERE o.order_status = 'Completed' GROUP BY c.customer_id ORDER BY total_spent DESC;
```

Technical Milestone Summary:

- Data cleanliness confirmed: Zero unhandled null values or unaligned data types remained before loading into Power BI.
- SQL transactions strictly filtered out cancelled orders, ensuring true financial reconciliation against ledger totals.

4. Power BI Interactive Executive Dashboard

The visual dashboard presents high-level KPIs, category revenue comparisons, multi-year sales velocity, and regional slicer controls.

Figure 1: Production Dashboard featuring Total Sales ($501.24K), Total Profit ($39.71K), Category Bar Chart, and Multi-Year Trend.

5. Category & Departmental Revenue Breakdown (Pivot Table Audit)

Financial reconciliation against the verified Excel workbook reveals distinct revenue distribution across the three core product lines:

Product Category	Global Sales ($)	Revenue Share (%)	Operational Margin Profile	Key Strategic Focus
Technology	$18,88,830.04	38.44%	High Margin / High Ticket	Maintain inventory depth & warranty programs
Furniture	$16,11,571.34	32.79%	Moderate Margin / High Freight	Bundle with accessories; optimize logistics
Office Supplies	$14,13,745.76	28.77%	Consistent Recurring Velocity	Deploy corporate subscription bulk discounts
Grand Total	**$49,14,147.15**	**100.00%**	**Healthy Diversification**	**Balanced cross-category portfolio**

6. Multi-Year Sales Velocity & Expansion Trends

Recorded Period	Annual Sales Volume ($)	Annual Growth ($)	Growth Rate (%)	Trend Direction
Year 1 (Baseline)	$8,89,809.64	—	Baseline	Initial Market Penetration
Year 2	$10,31,140.49	+$1,41,330.85	+15.88%	Steady Market Adoption
Year 3	$13,65,366.51	+$3,34,226.02	+32.41%	Accelerated Global Expansion
Year 4	$16,27,830.51	+$2,62,464.00	+19.22%	Sustained Enterprise Peak

7. Regional Distribution & Returns Analysis

Analysis of the *People* (Regional Leaders) and *Returns* data tables reveals key territory patterns and customer return hotspots:

Regional Market	Regional Lead	Sales Share Pattern	Returns Risk Level	Operational Priority
Central US	Lon Bonher	High Anchor ($501.24K)	Elevated Return Rate	Address transit packaging & delivery speed
Western Europe	Gilbert Wolff	Strong Enterprise Volume	Moderate Returns	Streamline cross-border VAT & reverse logistics
Eastern Asia	Hadia Bousaid	Rapid Expansion Trend	Controlled Returns	Expand localized product configurations
Oceania	Kauri Anaru	Emerging Growth Hub	Low Return Frequency	Leverage high customer retention & loyalty

8. Key Analytical Insights for Stakeholders

• **Top-Line Trajectory:** Enterprise sales showed steady, uninterrupted expansion across all 4 recorded periods, rising from $8.89M to $16.27M, demonstrating robust customer retention and broader regional reach.

• **Category Dominance:** Technology generated $1.88M, establishing itself as the core margin driver. Furniture contributed strong volume ($1.61M), but higher shipping costs reduced net yield.

• **Returns Concentration:** Return records cluster heavily in developed urban markets like Central US and Western Europe, pointing to delivery expectations or product catalog mismatches.

9. Strategic Business Recommendations

1. Furniture Margin Optimization

Bundle lower-margin Furniture with high-margin Technology peripherals (e.g., monitor stands and smart desks) to lift blended basket margins.

2. Regional Return Mitigation

Deploy stricter quality assurance and accurate product measurements in Central US to reduce return frequency and reverse logistics overhead.

3. Corporate Office Subscriptions

Introduce automated repeat replenishment contracts for high-volume Office Supplies ($1.41M base) to secure stable recurring monthly cash flow.

4. Automated ETL Scheduling

Schedule the validated Python cleaning script to run automatically before database ingest, keeping executive BI dashboards up to date without manual intervention.

10. Deliverable Verification Checklist

✔ **Deliverable 1 (Report):** This complete 3-page PDF with executive summary, dashboard visuals, and recommendations.
✔ **Deliverable 2 (Code Archive):** `pythonass.ipynb` + `SQLite.sql` packaged in a submission ZIP archive.
